

# CollabCloud

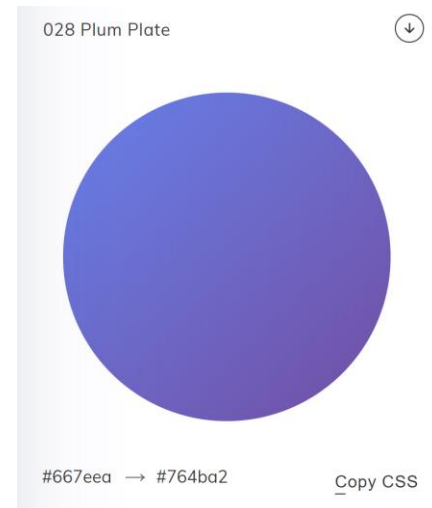

## UI/UX Layout

### Color Theme

Collectively as a group, we voted on a color gradient that all pages and components will follow. This gradient will be applied to all viewable components to give the user a sense of consistency within the application

# CollabCloud

*The CollabCloud logo (note: the color theme gradient will be applied to the logo as well)*

### Application Flow

*note: images are located under the /UIUX directory*

**Authentication:** *Auth.png* contains the wireframe diagram of the process of authenticating a user:

- If a user already has an account, they can enter their credential and login, at which point they will be taken to their dashboard page
- If a user is visiting the website for the first time they will have to register for a new account, they will be redirected to the GitHub verification page and will be asked to verify their GitHub account with CollabCloud, after this they will be redirected to their dashboard

**Exploring Projects:** *ExploreTrending.png* contains the wireframe diagram for the process of searching for a project to work on. From the dashboard the user may either choose Explore or Trending which would show the following for each respectively:

- Explore: The explore page displays user submitted projects that are currently looking for developers. The projects displayed are curated based on the user's preferences for languages and skill level
- Trending: The trending page features projects that are gaining traction and increasing in popularity within the CollabCloud platform

**Creating Projects:** *CreateProject.png* contains the wireframe diagram of the process of creating a new project:

- From the dashboard a user can select the Create Project link and be directed to a project creation page
- On the creating page, a user is able to specify specific details about their projects and the type of developers they are looking to collaborate with, as well as an optional location feature to allow project owners to look for more local collaborators

**Hackathon:** *Hackathon.png* contains the wireframe diagram flow for hackathons

- From the dashboard, a user is able to select the hackathon link which would take them to a page of local hackathons happening around their area
- Users are able to view workshops, locations as well as have the ability to search for teams' members w/ skills
